

Installation Clearances (For SV Models)

⚠ WARNING

Before installing, check for the following:
 Install in accordance with relevant building and mechanical codes, as well as any local, state or national regulations, or in the absence of local and state codes, to the National Fuel Gas Code ANSI Z223.1/NFPA 54 – latest edition. In Canada, see NSCNPIC for detailed requirements.

Item	Check	Illustration
Required Clearances From Heater	<ul style="list-style-type: none"> Maintain the following clearance from both combustible and non-combustible materials. 	
Cooking Equipment	<ul style="list-style-type: none"> If the unit will be installed in the vicinity of a permanent kitchen range or stove that has the possibility of generating steam that contains fats or oils, use a dividing plate or other measure to ensure that the unit is not exposed to air containing such impurities. * The dividing plate should be of noncombustible material of a width greater than the water heater. 	
Securing of space for repair/inspection	<ul style="list-style-type: none"> If possible, leave 8" or more on either side of the unit to facilitate inspection. If possible, leave 24" or more in front of the unit to facilitate maintenance and service if necessary. If possible, leave 3" or more above and below the vent pipe to facilitate inspection and repair if necessary
