

EZ SERIES

Direct Tank Replacement

GQ-C3260WX-FF US (EZ111DV) / GQC2860WX-FF (EZ98DV)

Engineered expressly for the North American residential market, the EZ Series of high-efficiency, condensing tankless water heaters from Noritz America are designed to cut installation time and cost when replacing larger, storage tank-type units.

FEATURES

⇒ The Industry's Best Warranty

Our EZ Series units now come with an industry first: an unmatched 25 year warranty*

*(Visit www.noritz.com/ezwarranty for more information)

⇒ Dual Stainless Steel Heat Exchangers

Our stainless steel heat exchangers have a greater resistance to corrosion and scale buildup.

⇒ Top Mounted Connections

Hot and cold water connections come located on top of the unit - not the bottom like most tank heaters. This allows for installation flexibility.

⇒ Wireless Capable

Together with our NWC Adapter (sold separately), you can control your heater functions and diagnostics straight from your smart phone.

SPECIFICATIONS

		EZ111DV	EZ98DV
Weight		70 pounds
